RE: Welcome

Dear Mr. Hopkins

We would like to take a brief moment to welcome you into our office as the newest member of our growing family of patients. Moreover, we wish to thank you for the vote of confidence you have shown by selecting our office for your healthcare needs.

Our goal is to optimize your Neuro musculoskeletal function through gentle spinal adjustments, adjunctive therapies and lifestyle changes. We strongly advocate a team health care concept and will make appropriate referrals to medical doctors and other health care specialists to best serve your needs. Our mission is to treat you ethically and respectfully while improving your health and well being.

In addition to your in-office treatments, you may be given specific recommendations for you to incorporate into your daily routine. The purpose of any lifestyle recommendations you may be given is to enhance your body's ability to heal itself. Some examples may include posture awareness, proper lifting techniques, exercise, nutritional supplements and dietary changes. Your active participation in your health care program is imperative. The state of your health is very much our concern and we hope that you will allow us to help you.

In closing, we would like to let you know that if you have any questions regarding your individual health care program or anything else for that matter, please feel free to drop by and see us or call us. We will do our best to address all of your concerns.

Finally, if you know of any friends or family members that you feel may benefit from our type of health care services, please let them know about us. Helping others is what our practice is all about.

Best regards

Dr. Sofiqur Rahman
